Conveying

APPLICATION

Chain conveyors with endless chains with feed dogs in closed troughs are suitable for the transport of bulky material.

This version of Vecoplan-chain conveyors transports the material in the lower run by means of two inside conveying chains with 11.2 t, 16 t or 22.4 t breaking load. The chains run in the return on low-wear chain guide rails and are additionally covered in the feeding area so that no material can get into the chain.

By use of upper and lower elbows the course of chain conveyors is almost on choice. Motorical or pneumatical slides allow additional user-defined discharge positions.

Vecoplan[®]

KKF 2K-U

Example

KKF 2K-U

DETAILS

		KKF 800-2K-U	KKF 1000-2K-U	KKF 1200-2K-U
Width of trough A	mm	800	1000	1200
Total width B	mm	930	1130	1330
Conveying capacity approx.*	m³/h	135	170	205

Subject to technical changes without notice / Dated 01/2010

* at conveying speed of 24 m/min. and horizontal course

Example

KKF 800 / 1000 / 1200-2K-U

Chain conveyors with endless chains with feed dogs in closed troughs are suitable for the transport of bulky material.

This version of Vecoplan-chain conveyors transports the material in the lower run by means of two inside conveying chains with 11.2 t breaking load. The chains run in the return on low-wear chain guide rails and are additionally covered in the feeding area so that no material can get into the chain.

By use of upper and lower elbows the course of chain conveyors is almost on choice. Motorical or pneumatical slides allow additional user-defined discharge positions.

KKF 670 / 820 / 970 / 1150-2K-U

Chain conveyors with endless chains with feed dogs in closed troughs are suitable for the transport of bulky material.

This version of Vecoplan-chain conveyors transports the material in the lower run by means of two outside conveying chains with 11.2 t breaking load. The chain runs on low-wear chain guide rails that are entirely covered in the feeding area so that no material can get into the chain.

By use of upper and lower elbows the course of chain conveyors is almost on choice. Motorical or pneumatical slides allow additional user-defined discharge positions.

KKF 850 / 1050 / 1250 / 1450-2K-U

This version of Vecoplan-chain conveyors transports the material in the lower run by means of two outside conveying chains with 16 t breaking load. The chains run on low-wear chain guide rails that are entirely covered in the feeding area so that no material can get into the chain.

By use of upper and lower elbows the course of chain conveyors is almost on choice. Motorical or pneumatical slides allow additional user-defined discharge positions.

KKF 1800-2K-U

Chain conveyors with endless chains with feed dogs in closed troughs are suitable for the transport of bulky material.

This version of Vecoplan-chain conveyors transports the material in the lower run by means of two outside conveying chains with 22.4 t breaking load. The chains run on low-wear chain guide rails that are entirely covered in the feeding area so that no material can get into the chain. Due to its robust and wear-resistant design this type of Vecoplan conveyor is particularly suitable for extreme conveying capacities.
